

DIGITAL WINGS

Aspiration & opportunity

Digital Wings Year 2020 Donor report

The Year in Brief

Kia ora koutou Digital Wings business donor partners

As experienced across Aotearoa and the rest of the world, 2020 was certainly a year for upheaval for Digital Wings. Programme Director Di Daniels relocated from Kāpiti to Te Tai Tokerau in February, settling into her Far North home office in March, just days before lockdown. Plans of making a difference to Digital Inclusion in the region and in a new community immediately went on hold while we all watched and waited for what lay ahead.

In earlier March, one of our charity partners, Digital Inclusion Alliance Aotearoa's digital bus DORA's itinerary included Northland using Digital Wings' laptops on board for financial literacy classes, so together we made it into the Whangarei Leader. DORA spent some time in the Daniels' driveway while Di's driver-husband ferried the mobile classroom between Northland libraries on both sides of the lockdown period. Collaborations between charities delivering to the same communities work well and we covered Kerikeri, Kaikohe, Kawakawa, Paihia and Dargaville.

Like everyone else we descended into the world of Zoom meetings, cancelled flights and engagements and worrying how we were going to continue our services. Fortunately, our recycling partner RemarkIT Solutions was deemed a compulsory service in waste management, so we kept trading amidst the difficulties of freight deliveries and reduced staff.

During those difficult Covid months, both businesses and charities closed their physical doors whilst still striving to deliver their services to clients. This meant more and more charities had need for laptops and technology to work from home to support their vulnerable communities. Meanwhile in an uncertain financial climate, businesses deferred their planned computer upgrades and sent decommissioned viable equipment home with their own staff instead of donating. For

Digital Wings this meant a sustained demand for gifting outwards and a paucity of corporate donations inwards. By September we had run out of laptops and RemarkIT Solutions stepped in to fill the deficit from their proportion of stock. By December 2020 laptop stocks were alarmingly low again and remain so into 2021.

However, we managed to honour our contract with the Ministry for the Environment, even excelling the amount of e-waste diverted from landfill. Unfortunately within that, the proportion of viable equipment was reduced. Here is our progress since we began in January 2017, clearly showing how Digital Wings has been able to extend its reach with support from MfE since April 2019 and the significant contribution of our business donors to end-2020.

DIGITAL WINGS PROGRESS 2017-2020 INCLUSIVE

Year Jan – Dec	New corporate donors annually	e-waste diverted from landfill	Charities served annually	Number of tech items gifted
2017	5	Est. 50 tonnes	16	174
2018	5	est. 50 tonnes	93	182
2019	21	190.55 tonnes	110	932
2020	19	206.74 tonnes	157	990
TOTALS	50	397.3 tonnes	360 nationwide	2278 tech items (22.78 tonnes)

Seeking More Corporate Partners

The challenge to bring on board more corporate partners was exacerbated in 2020 with trips to Wanganui, Waikato and Tauranga regions cancelled, so we tried to move more locally in Northland. By end of 2020 there were 26 new charities in Te Tai Tokerau benefiting from Digital Wings gifted computers, but not one corporate donor. So, in an effort to raise our profile in the business community we joined Northland Chamber of Commerce who suggested we enter their Westpac Business Champion Awards. There is only one entry allowed each, and further nominations were invited from clients. Huge thanks to all the businesses and charities who nominated and supported our entry.

Digital Wings Finalist in 2 categories: Environmental Business and Business Innovation Champions

We are still working on securing northern businesses to support the Digital Wings communities in the region.

Until November 2020 we had a similar situation in Otago-Southland – numerous southern charities supported but only 2 Christchurch donors: Canterbury DHB and MyITManager. On invitation from CCL and Spark Business we ran 2 lunchtime presentations for their business clients in Dunedin and Invercargill, with fantastic results! 3 of our charities came along and shared the positive difference their increased Digital Capability had made to their organisations. From this venture 5 new local donors have signed up and 11 more in negotiation. We used a model of engagement pioneered by Spark Business in Napier which resulted in 8 Hawkes Bay donors, so are keen to replicate around the Motu if any of you can champion the cause and host a meeting please.

DIGITAL WINGS DONORS AND SPONSORS TO MARCH 2021

Transpower	Westpac	TWOA	Mercury	BNZ	RemarkIT	Z-Energy
Canterbury DHB	Oji Fibre	Honda	Bakertilly SR	E Tū	LexisNexis	Toyota

Serving Digital Wings' Charity Partners

Connecting with charities nationwide and witnessing the work they do is the heart-warming and rewarding side of a programme like Digital Wings, for both the donor companies and the technical team at RemarkIT Solutions who manage the redeployment of equipment. We want to assure you, our donors, that our communities appreciate the opportunity we collectively provide for them to increase their digital capacity and efficiency, whilst also raising Digital Inclusion and Digital Literacy on their regions. Together since 2017 we have impacted small isolated charities as well as significant sectors with national coverage e.g. 29 Youth Education & Employment Trusts; 16 Children's Camps and Trusts; 57 Social Services; 9 Graeme Dingle Foundation; 20 Health charities; 35 Marae and Māori Rōpū; 8 Environmental; 16 Literature, Arts and Culture; 5 Animal Rescue; 10 Sports & Outdoor Pursuit; 2 Food Recovery; 27 Playcentres; 10 Parents Centres; 32 Toy Libraries; and 41 Literacy Aotearoa across 10 regions. Full list here:

<https://www.digitalwings.nz/recipients.html> and Covid thank you stories here

<https://www.digitalwings.nz/testimonials.html> . **Together we made a difference.**

Stories and Outcomes from around the Motu – We ask charities how Digital Wings equipment has increased their digital capacity and helped them reach their client outcomes, many of whom are children.

The Champion Centre Christchurch provides multi-disciplinary early intervention services to infants and young children with significant disabilities and their families in Canterbury, including Down syndrome, other genetic disorders, cerebral palsy, extreme prematurity, epilepsy, developmental dyspraxia, Autism Spectrum Disorder and brain injury. Champion Centre goals were to increase productivity and performance of staff with laptops, and engagement for children in the Technology Assisted Learning programme through use of software and APPs on iPads. In 2020 they provided service to 230 children and their families, an email data base of 1500 and social media community of 3400. *“2020 saw a strong need to reach out...through our social media presence for our wider whānau to support each other, and those families whose bubble saw them potentially at risk with compromised immunity [and] the need to provide services at a distance. Without the 5x iPads at the onset of the [Covid-19] isolation period, our families and their children would have struggled to continue with their intervention programmes during lockdown. The APPs on the devices and subsequent Zoom meetings to assist caregivers, meant no time was lost in keeping children on task with their development.”*

[Champion Centre Gala - YouTube](#)

Leg Up Trust, Riding for the Disabled and Mini Haha Haven Rescue

Digital Wings has been able to dramatically increase the efficiency of small charities, like those working with horses and youth to increase troubled or disabled children’s resilience, confidence and focus whilst also rescuing horses.

Leg-Up Trust: *“The timing for us could not have been better as we are just beginning to complete Correspondence school work for one of our individual students and were looking at having to use my office computer for her to complete her work. This of course would make my administration job very difficult. Having the two new computers means we can offer Correspondence work to other students as well which is just fantastic. From Ros and the team at Leg-Up we wish you the very best and cannot emphasise enough how valuable these computers will be.”*

Mini Ha Ha Rescue: *“I am so grateful for the laptop for the Haven. I am just on my way to the accountants this morning and having a laptop to take with me is amazing. We are forever grateful...our accountant would have had to travel to us and that's a charge in itself over and above her time. I have bought a little table so I can sit on the couch at night and do my work. My appreciation for your support. I love saying thank you and for us little guys our Laptop has been huge.”*

Riding for the Disabled Manawatū: *“I'm gobsmacked we could have a desktop and a laptop! Words don't describe how much that helped us set ourselves up.”*

Playcentres and Parent Centres nationwide are also supporting children’s education and families’ social cohesion.

Stratford Parents Centre report:

- *Social outcomes – we now have access to fast and effective communication to all enquiries in regard to childbirth education courses. The laptops enable us to carry out vital social media advertising and posts to all our members and the wider community.*
- *Educational outcomes – with COVID-19 challenges we are now able to offer ZOOM education classes in lieu of attending them at the centre. Our committee members are able to keep in touch with all enquiries using the laptops now, making it much easier in their busy mum lives!*

“Having 2 laptops to share the busy volunteer workload has been so helpful. It has taken the pressure off having to use our phones or personal PC's to complete tasks and communicate with the community. Being able to store documents and private information from members on laptops specifically for the centre is much better governance for current and future committee members.”

Ashburton Baptist Preschool Trust share *“teachers have been able to use the computers to write narrative assessments and plans for children in the form of learning stories – we have also been able to go online and utilise ‘storypark’ an app that allows children’s families to view their learning online and share with other family members. They can also contribute and have a voice in what their child is learning and how we implement strategies. We are*

very thankful for this. We have updated our student management system (a software for managing enrolments) and there is a capability to have the parents sign in and out electronically on a tablet [if we could source some]. We can preload messages that are specific to each parent on pick up or departure as each parent would have a log in. The main outcome would be improved communications with families for better quality care and education for children with good informative information."

Toy Libraries make a wide range of toys available on loan to families and 32 diverse toy libraries from the Far North to Far South, many of them rural, have benefitted from your donations.

"Your laptops have really made a huge difference. Our old laptop was slow and kept freezing so it was frustrating for the volunteers to try and return the toys as well as the members waiting for the toys to be returned as we use an online system so having a fast and stable laptop is critical. At the end of 2019, we [Mt Albert] had 118 families with 191 children who would have benefited from your laptops."

"Thank you Digital Wings for donating a laptop to the Otaki Toy Library! It has become a game changer for us during our busy days. We are helping people faster and the wait times have drop

significantly. We really appreciate what you do as it gives charities like us the ability to give back to our community too."

Rolleston Toy Library: "We are the only fully online toy library in NZ so having computers to operate with has made getting set up much easier. Our toy library has had its challenges over the last year with finally getting up and running and then having to shut down a few months later with covid lockdowns. Then we reopened for a few months and we had to shut down again due to our premises being sold and we had to vacate. Currently we are working from a temporary site with two donated containers however we are still operating and our members are loving the services. We appreciate the donation; resources are hard to come by for organisations like ours and this was just amazing. Things like this give the entire committee a boost and give us the drive to keep going when times get tough."

Masterton Toy Library shows wider community benefits often exceed their library loans by:

"- Social outcomes – we have significantly increased our online and community presence by being able to have better access to resources such as email, social media and also able to design print media to distribute. This in turn has meant more families and institutions have had the opportunity to hear about us and find out what we can do for them. We were given notice to move from our premises, however because we were able to make our plight so public using social media, we managed to find a new building and have since moved in. Without the use of these computers, there is a very real likelihood that we would have had to close our doors.

- Educational outcomes – As a result of social media, we are in the process of forming a relationship with a local youth program. We will begin to provide opportunities for 14-15 years old to come in and help out with tasks in the toy library as part of their community volunteering requirements for their program.

- Environmental outcomes – we are reducing our waste as we slowly begin to email rather than print things.

- Economic, employment outcomes – by increasing our online and community presence, we have also attracted lots of new members which is a large economic benefit for us."

Birthingright Hawke's Bay say their computers made a huge difference in helping families. "As a part funded [charity] we are always seeking funds to cover operational costs. IT support and computer expenses is one area we are often lagging behind on resulting in having to use old and increasingly unreliable equipment. This donation has enabled us to replace 5 of our oldest laptops and equip our mobile staff with smaller, lighter, reliable and fit-for-purpose laptops that are in use every day helping to support individuals, families and whanau across Hawkes Bay."

Note- In most cases each family involves working with multiple individuals.

Community team – 182 families Social workers in schools – 55 Families Supervised Contact- 129 Families.

Some success stories involving staff using the donated laptops include:

- Supporting children and parents to make positive progress around challenging behaviour in schools and home.
- A number of families have improved financial situations as a result of our financial capability/ budgeting support.
- Coordination of supervised contact to enable children to maintain ongoing relationships with their parents.

Graeme Dingle Foundation supports kids to overcome life's obstacles and their centres benefitted from technology upgrades to extend their services to young people through schools in Northland, Auckland, Tauranga, Rotorua, Hawkes Bay, Porirua, Wellington, Canterbury and Southland, especially during lockdown. This shows what a wide coverage Digital Wings has, even within one organisation and the difference a significant amount of high-spec technology can make. Their National Office says *"The technology supplied by Digital Wings enabled our staff to work smarter at home! For our National team that meant working quickly to ensure our programmes were able to be delivered online. For our regional teams, the laptops enabled our staff to communicate with their students, especially through the first longer lockdown. They were able to create and share content, liaise with their team and with the wider Dingle whanau. We are reaching over 27,000 tamariki and rangatahi across Aotearoa, the support provided by Digital Wings enabled us to support each and every one of them throughout the COVID impacted year!"*

Southland: *"Without the computer equipment three of our staff would not have been able to complete any work or engage as effectively with the rest of the team from home during lockdown. Our Kiwi Can Leaders created videos that were uploaded to YouTube for our Kiwi Can schools. They used their laptops to edit and upload the videos. The laptops enabled us all to communicate regularly via Zoom. Not only valuable from a work perspective, also to ensure that our staff were doing okay and providing connection opportunities. All of our staff now have a laptop which is essential for their role. Lesson planning and creation of lesson resources, engagement internally and externally via email/Zoom, accessing documents in our system, accessing professional development opportunities etc."*

<https://www.youtube.com/channel/UCShcikiMJvny2BZqo1xAyJA/playlists>

In Porirua: *"2020 was all about resilience and respecting themselves, their whanau and local community by practicing overcoming their obstacles through in-school lessons and at home during lockdown. Throughout 2020 our ultimate goal was to continue to deliver our youth development services to young people who need it the most despite the global pandemic. The donation of the equipment helped us to streamline programme delivery to over 640 tamariki and rangatahi in Porirua and enable us to continue to plan and deliver services during lockdown periods."* [App-1]

At least 30 other organisations working with youth education to employment have received gifted computers from our Digital Wings business partners' donations.

Golden Bay WorkCentre Trust: *"Previous to the new laptops, we had very old laptops which could not be upgraded to Windows 10. This meant students had to share equipment which slowed them down and caused frustration. It affected attendance and outcomes. The new laptops meant everyone in class had their own computer and these were of a high quality which enabled them all to work consistently and efficiently towards their goals. As a result, students retained their level of focus and enthusiasm throughout the course, which led to higher outcomes for all. Since the course ended Dec 2020, the laptops have been repurposed to other GBWCT projects for staff use to replace outdated hardware and supply new staff with the equipment they need to effectively do their jobs."*

Tui pictures here, says *"The new laptop is awesome. It has better general operating capabilities and has a built-in webcam! This has been really useful with more Zoom meetings to catch up with the other Connectors and providers around the region, and getting the new website up and going. Plus it's been really handy being able to work from home when needed and still easily be able to access the files I need to continue working with my clients or on current projects. Such a good resource, thanks!"*

Rotorua Youth Centre One Chance Programme

“On behalf of OneChance Charitable Trust and our students thank you so much for donating the desktops and laptops. It has proven to have helped us immensely with the management aspect but also allowing the students the freedom to organise their youth and community events. We endeavour to do the best work we can with our youth and when organisations like Digital Wings contribute to our vision it is very humbling and we are grateful. The students in the attached photos are from the OneChance Youth Project, our flagship program we have been running for 8 years. Each year for the last 4 years they have organised the annual Rotorua Youth Awards, a large community event celebrating youth

achievement and success.” <https://www.youtube.com/watch?v=PAmQPQIWio0&ab&ab>

Inspiring Stories Future Leaders programme supports rangatahi to build strength across a range of outcome areas. The quantitative data below is a summary of the 2020 survey responses, where participants indicate the extent to which the programme has had an impact: 95% Problem solving skills; 96% Communication skills; 96% Personal & social skills; 98% Leadership skills; 91% Entrepreneurship skills, & ability to turn ideas into action.

“When we received the Digital Wings laptops, I took them to a full Future Leaders event in Whakatāne to support attending the online Festival for the Future event in July 2020. The laptops were really useful for this event and enabled many young people to take part in the online workshops and watch speaker sessions and for staff to work from home. We really appreciate Digital Wings support last year – your turn around and relationship management has been brilliant.”

Health and Social Services also struggle to secure funding for effective technology to enable them to serve their communities and this was exacerbated during Covid isolation months.

Paparoa Parish in rural Kaipara issue thanks for the donated PC and laptop to replace their “ancient” technology. *“Its limitations came to me when I was involved in a webinar for Victim Support. I ran out of data at home so thought I would use the church computer. It was not until the webinar started that I realised it did not have a camera or mic. I was a black square on the screen and could not participate! We also could not update it from W7. The laptop is an incredible gift and to have Windows software already installed is much appreciated. This is something we would not have been able to afford, especially in our current environment and it is great to have up-to-date tools.”*

The Acorn Project supports young people aged 12 to 24 years and their family living with cancer in Hawkes Bay. *“Digital Wings computers enable us to expand our reach within the community, communicate with our members and other community groups, keep accurate records including accounts and member details, staff hours, board minutes, funding applications and supporter/sponsor information. During Covid-19 restrictions, Digital Wings technology helped by we were able to keep in contact with our members with: Email, messages, Zoom and Skype, Messenger calls. We have also used them throughout the year to keep in touch with our funders and supporters, keep track of our accounts, keep our website and Facebook page up to date. We are currently using them to upload all our member information to an online database we have had created. All of these have enabled to achieve the outcomes we set ourselves. We currently have over 100 members, 14 volunteers that have benefitted by having the laptops either by hearing about us, or from the access to funding we have received via online systems.”*

The Gut Cancer Foundation thanks you for your generous donation of a laptop for their new fundraising staff member. *“GCF is a small but growing charity. Contributions like this one from Digital Wings are exceptionally important as they help us to keep our costs low and release more funding for vital research and awareness raising. Over 5,100 New Zealanders are diagnosed with one form of gut cancer every year and unfortunately, survival rates for this group of cancers are particularly low. Your generosity will help in our mission to increase survival rates, life expectancy and quality of life for gut cancer patients and reduce the number of New Zealanders that develop gut cancers in the first instance.”*

Digital Wings has supported 50 women's Refuges and other violence intervention agencies. **Porirua Living Without Violence (PLWVS)** *"We would like to once again thank Digital Wings and the Team at RemarkIT Solutions for the 7 desktops, 6 laptops [which] allow us to provide a more efficient service to our clients. They definitely came at a much-needed time, we picked them up the 25th March 2020. And as of the 26th March 2020 New Zealand went into lockdown due to COVID-19. As PLWVS was classified as an essential service provider, we were very committed to providing a range of on-going safety and non-violence programmes / sessions and assessments to perpetrators and victims. Safety was always the priority. We modified our service delivery with staff working remotely. We used telephone and zoom to remotely deliver assessments, programmes, and individual sessions to clients. We had 6 staff providing sessions to Men and Women and had two staff working with the Tamariki and their caregivers. With clients on the Tamariki waiting list we interacted with weekly phone support to the caregiver and then conversations with the children. The first week of lockdown was contacting clients and letting them know the programmes would be operating remotely. We checked they were safe and managing their risks and we looked at how working remotely with them would work, for some is meant we provided credit on their phones so they could engage. The virtual PLWVS office remained open and all PLWVS men, women and children clients were contacted weekly over lockdown."*

Manchester House in Feilding provides non-judgemental non-discriminatory compassionate and caring support for those in need, providing integrated on-demand services to those in the community in times of need, including social work, counselling and family support services, budgeting and financial mentoring, parenting and early childhood programmes, a foodbank service and senior based programmes. *"We have had 30,000 plus contacts this financial year through our various services. We played a pivotal community role as an essential service during Covid-19, where we offered remote social work and counselling support and met emergency food needs that increased by 400% over that period."*

"Having updated technology has been significant. We have 30 staff in the organisation, all of whom need to be technically equipped to do their jobs adequately. Upgraded computers have meant less cost for us for maintenance and less technical issues impacting our time and energy. We are sincerely grateful for the donation. 7 staff members have been directly impacted though the provision of new equipment, but several thousand clients due to the wider ramifications of the donations. Our sincere thanks for your support. Computers are a necessary and difficult thing to fund, when of course, we want to focus as much of our capital as possible on direct service delivery. The upcycling aspect of this is also excellent, and on both a personal and professional level, I commend the reuse of resources."

Age Concern Wellington Region *"It is difficult to estimate the impact on our work of this donation to Age Concern. Had we not received them, we would have struggled to equip our staff with the tools they need. We have a small budget for IT each year, so this donation was most appreciated by myself and the Board. With a limited staff team, our computer systems are a critical support for us. Prior to the grant, several team members were frustrated with their computer setup. I wanted to ease this burden by providing them with some decent equipment so that they can focus on their role. The grant from Digital Wings has helped us do that and the laptops in particular (HP Elitebooks) are high quality. Digital Wings is playing an important role in our work of reaching Seniors throughout the Wellington Region."*

Manawatū People's Radio aims to provide opportunities, facilities, support and training to individuals and organisations in the community to create content that reflects their views and values. "Focus in particular is on minority communities with the aim of giving them a voice. The outcomes of this are increased community connection, engagement, cohesion and resilience. Digital Wings donations helped -By allowing us to connect remotely (in the case of personal laptops) during COVID and also record content remotely (via zoom) to ensure all staff could complete their work.

- By giving programme makers options to link more readily to zoom,

Facebook and other media whilst working in the studio, thus enhancing their programmes. (studio computers). We feel that Digital Wings has offered us incredible support and at this stage we feel resilient and well equipped with technology to help us meet our goals for the considerable future. During COVID 19, our ability to work remotely and to record programmes via zoom meant that new programme makers were inspired to have their voices heard and make content reflecting their unique views and values. Of particular note and

relevance was the emergence of a programme called Revisiting Resilience through two existing programme makers who joined together to create a show to support people in developing resilience in an ever-changing world."

<https://www.accessmanawatu.co.nz/>

Digital Wings has made an impact on marae communities nationwide and now especially around Te Tai Tokerau.

Te Whanau o Rangiwahakaahu Marae

"On behalf of the Marae Trustees and our Deputy Chair, Marion Kerepeti-Edwards, I would like to send you and Digital Wings a huge thank you for donating eight laptops and two desktop screens to our Marae based in Matapouri Bay, Whangārei. These resources will compliment what we already have in place and will enable our whanau, who live in the area, to have digital access, learning and communication especially during these trying and extraordinary times. Again, please accept our sincerest thanks and wishes for the future. Ngā mihi."

Moria Marae, Hokianga

"Ngā mihi mahana Digital Wings & RemarkIT for dispatch and amazing delivery of PC and 2-Laptops. Please see shots of Aunty Kahu Morunga who thankfully and happily received laptops & AIO on behalf of Moria Marae Trustees. I cannot express how much this means to Te Akinihi Tiapakeke Whanau to donate these to our tupuna whare. Let alone to know that it will be put to good use by Marae Trustees."

Rangatahi Digital Workshops, Tech Resilience and Training for Trainers

In 2019 we began Rangatahi Workshops to put tech mentors in front of youth audiences to inspire careers in tech. Covid restrictions saw us migrate this into video resources for charities to deliver online. The latest extension of this is to run Training for Trainers in Tai Tokerau for organisations working with youth education and employment. Our expert presenters here:

<https://www.newhorizonsforwomen.org.nz/wp-content/uploads/Janie-Titos-Her-Story.pdf>
